Allowable Subject Matter

1. Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach that, a sub-reflector surface coated with an RF reflective material having a periphery at a second diameter larger than a first diameter', and a leading cone surface extending from the wave-guide junction portion to the second diameter at an angle; the sub-reflector surface and the leading cone surface having a plurality of non-periodic perturbations concentric about a longitudinal axis of the dielectric block in combination with all limitations recited in independent claims 1 and 17.

The prior art does not teach which follow steps coating a sub-reflector surface of the dielectric block with an RF reflective material', the dielectric block having a plurality of non-periodic perturbations, the perturbations selected to create a desired RF pattern distribution in combination with all limitations recited in independent claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kildal (US 6,137,449) and Rummeli et al. (US 6,456,253) are cited to show a subreflector.
